ABOUT MOPO

INTELLIGENT TOILET

MOPO Sanitary Wares Co., Ltd is the most professional and experienced manufacturer specialized in designing and developing Ceramic Toilet with sophisticated technology and strict quality control system.

With a full supply chain and over 15 years of manufacturing experience, we are able to make all kinds of regular One-piece Toilets, Two-piece Toilets, Wall-hung Toilets, Pulse Toilets, and Intelligent Bidet Toilets, as well as to customize your special designs and styles to the very details.

With over 9 years of exporting experience, we are able to supply our qualified toilets to all countries and regions over the world wherever there is any demand, with very stable quality, supportive services and competitive prices.

Being the earliest manufacturer of Intelligent Bidet Toilets in China, we have self-owned R&D Institute and full production facilities, who have become the biggest and most professional supplier of Smart Toilet by playing the most important role in the field.

We are still on the way of learning and growing, wishing to see a better MOPO and a better YOU in near future.

We also provide OEM and custom made service for customers. We have acquired CE and cUPC certification for our products.

CONCISE AND ELEGANT

Decorate your fashionable life with elegant and concise aesthetics. It is so concise that it is just like a glass of clear water, light but leads you to endless aftertastes.

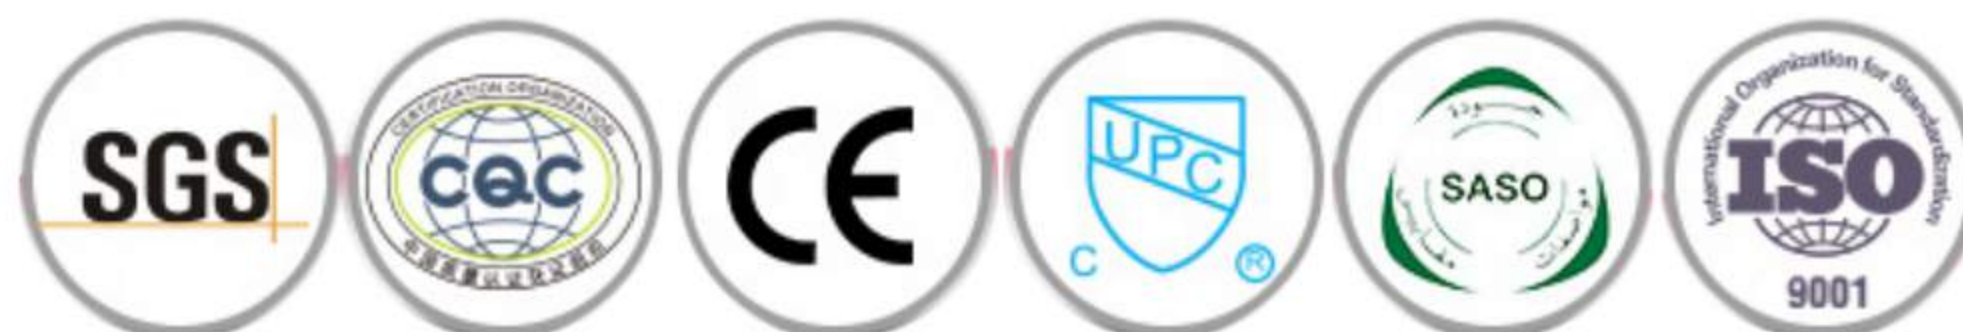

Fashion Life

Enjoy double comfort of water and art, every moment here provides you with spiritual intoxication.

Excellent quality, innovation, efficient management and constant development are our business targets. We would like to build up a long business relationship with you and to be win-win.

ALL ABOUT MOPO

MOPO Sanitary Wares Co., Ltd is the most professional and experienced manufacturer specialized in designing and developing

Ceramic Toilet with sophisticated technology and strict quality control system. With a full supply chain and over 15 years of manufacturing experience, we are able to make all kinds of regular One-piece Toilets, Two-piece Toilets, Wall-hung Toilets, Pulse Toilets, and Intelligent Bidet Toilets, as well as to customize your special designs and styles to the very details. With over 9 years of exporting experience, we are able to supply our qualified toilets to all countries and regions over the world wherever there is any demand, with very stable quality, supportive services and competitive prices. Being the earliest manufacturer of Intelligent Bidet Toilets in China, we have self-owned R&D Institute and full production facilities, who have become the biggest and most professional supplier of Smart Toilet by playing the most important role in the field. Automatic Forming

Our automatic molding facilities help us to get the maximum output of toilet with stable quality. All of our toilets have to take the leakage testing before packaging to ensure all delivery are free from cracks or leakage.

Firing Kiln

With help of advanced and smart shuttle kiln, all our toilets are fired properly, which guarantees the stable output of qualified toilets.

Dust-free Glazing

Our glazing is done inside the dust-free room to ensure the most smooth and even glaze surface finishing.

Research & Development

With our R&D facilities, we are able to help customers with more updated designs and custom orders. Our experienced QC team is active in all production processes from raw materials to finished toilets under international standards.

BENEFITS & TECHNOLOGIES

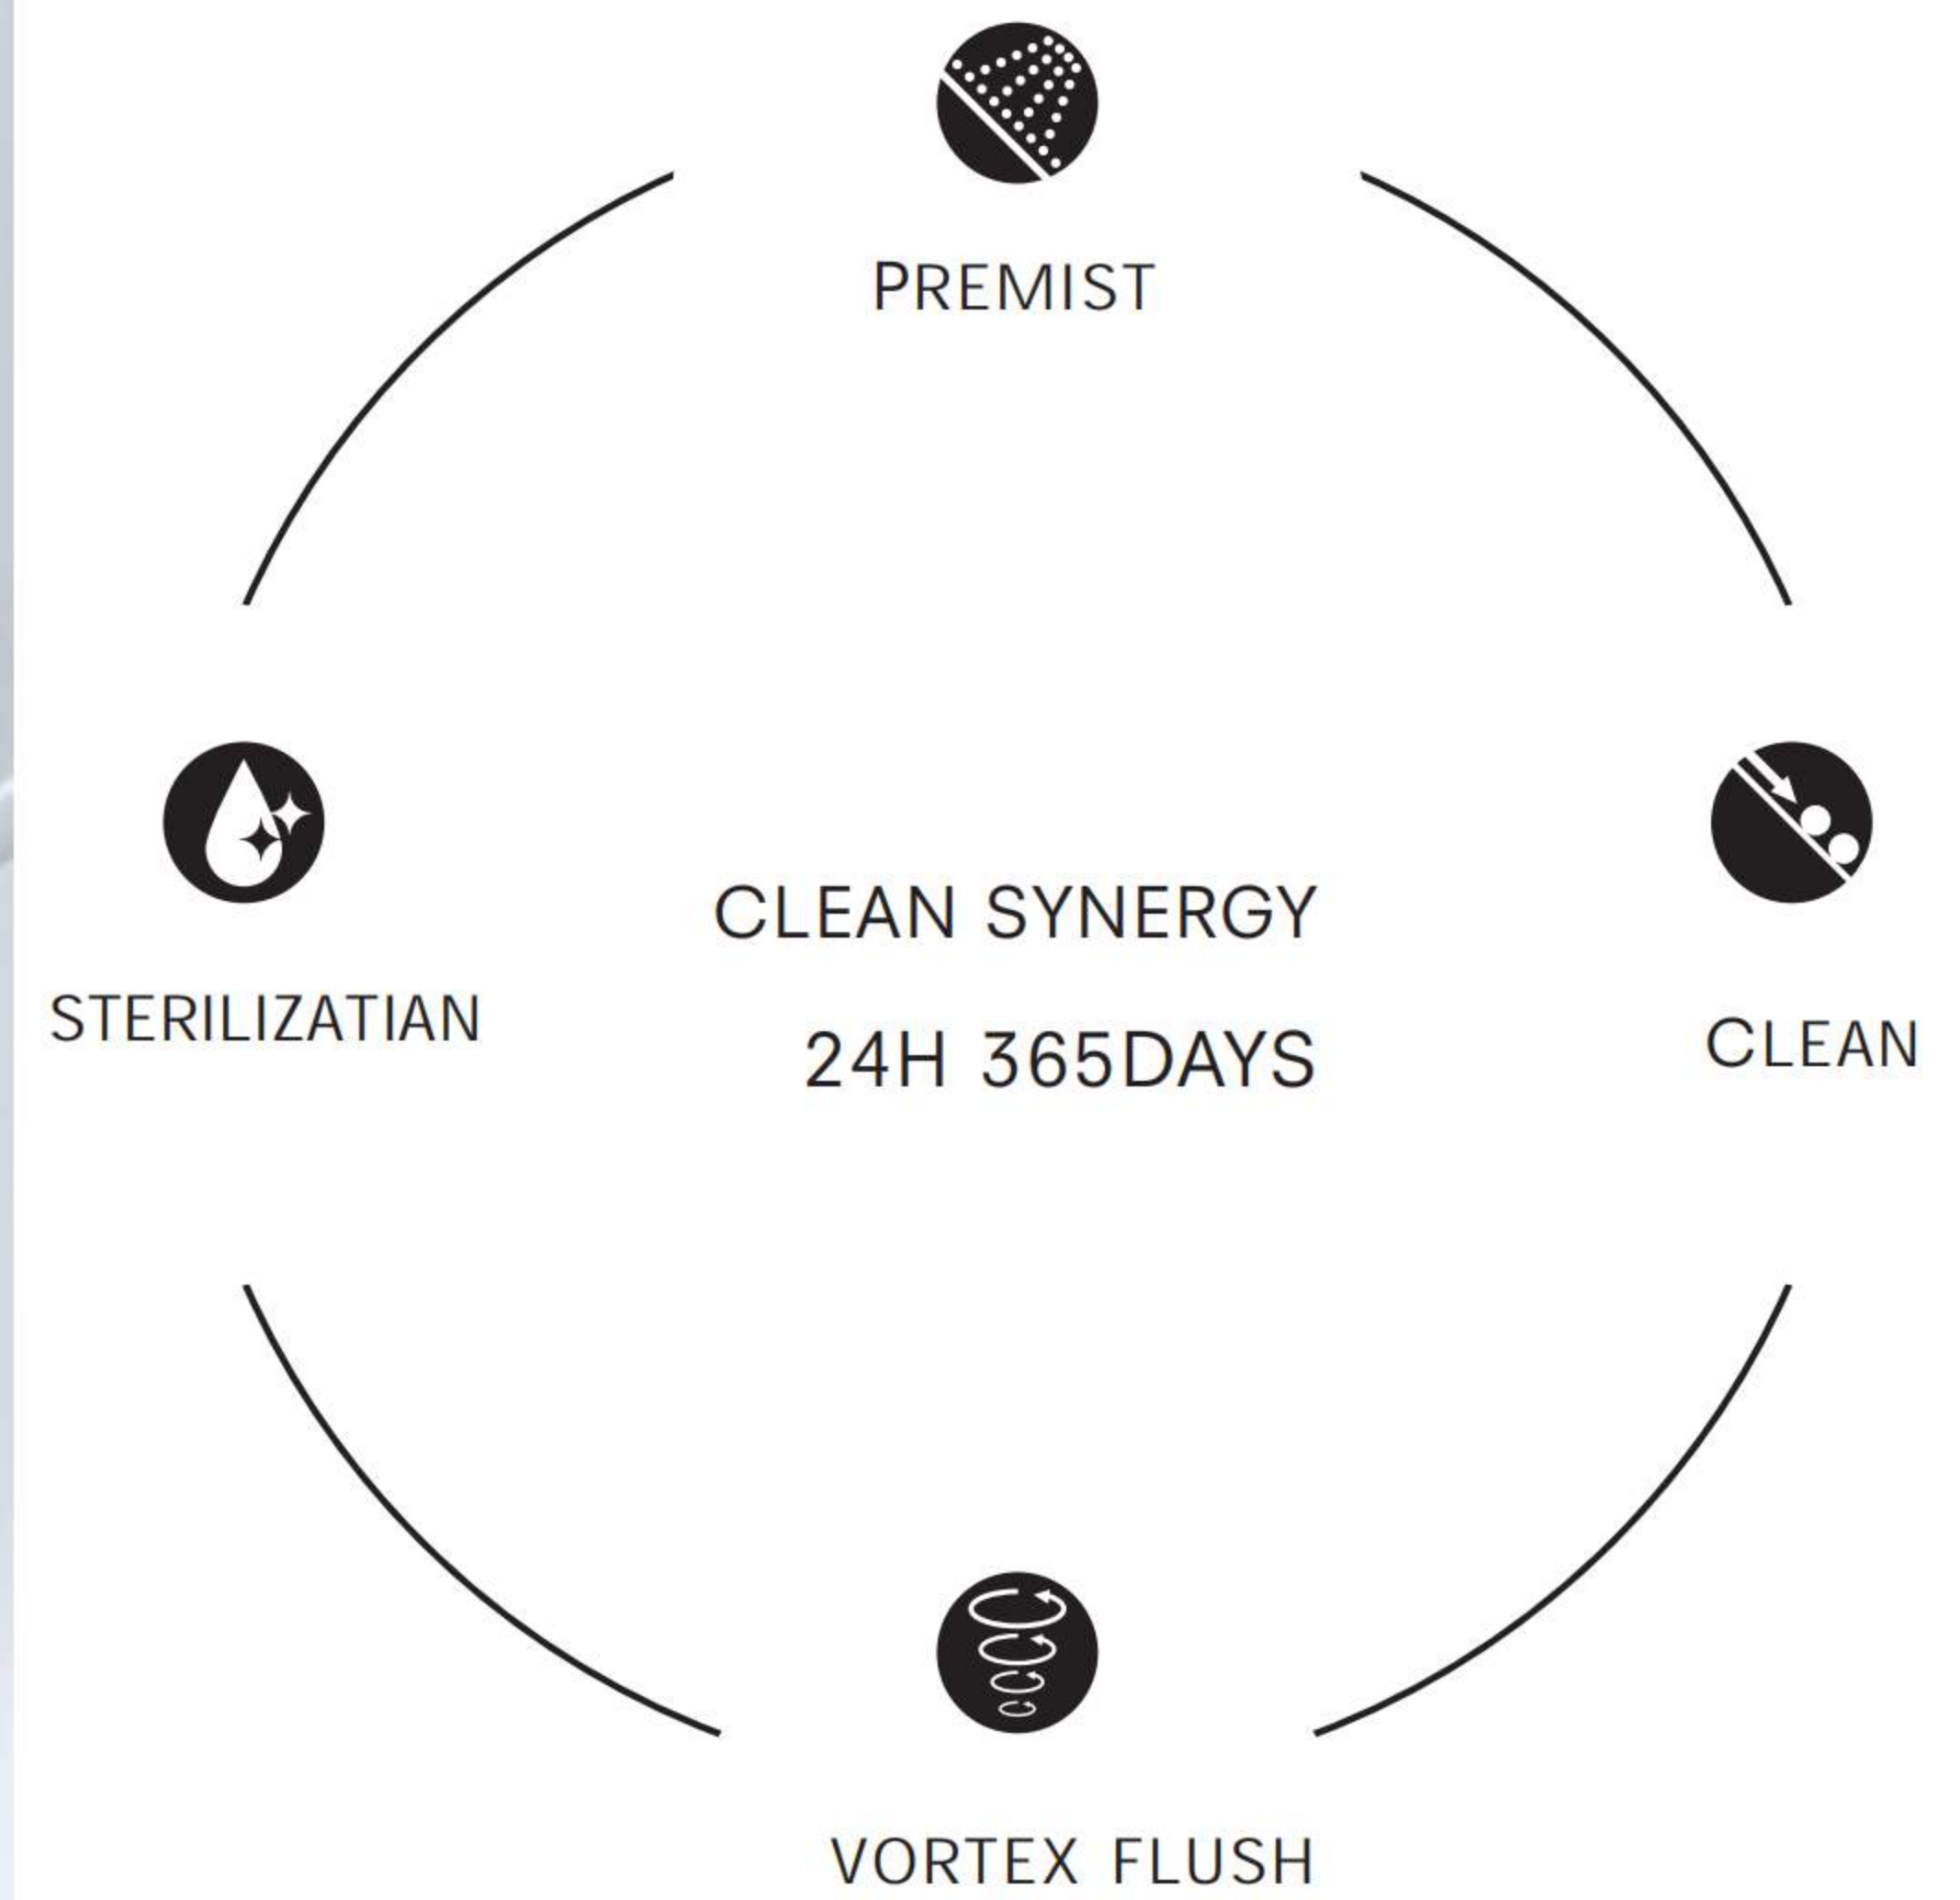

BENEFITS & TECHNOLOGIES

INSTANT HEATED WATER

Out of the water, it is hot and intelligent constant frequency constant temperature

Automatic Cleaning New Experience Every Time

MOPO CLEANOVATION

CLEAN SYNERGY

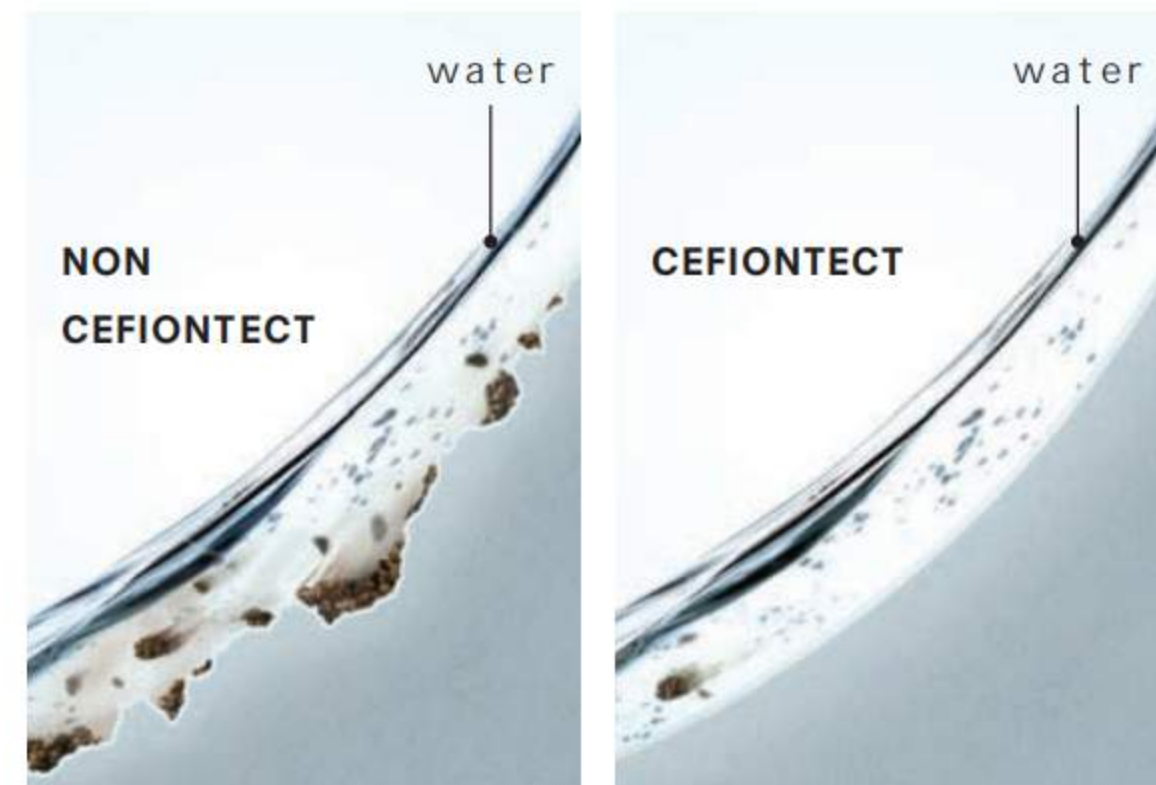

CLEAN

Smooth ceramic surface, no trace of cleanliness

The ultra-smooth surface ridges are covered by a glaze coating, preventing the waste particles from lying on the surface. Keep toilets clean and durable

STERILIZATION

Easily decompose the bacteria water to decompose dirt

The nozzle and the inner wall of the toilet are easily contaminated by dirt and bacteria, and dark spots are inevitable. The electric bacteria removal water can clean and sterilize the nozzle and the inner wall of the toilet. Does not contain any chemicals and cleaning agents, so you can use it with confidence every day

VORTEX FLUSH

360° cleaning power reaches every spot using less water

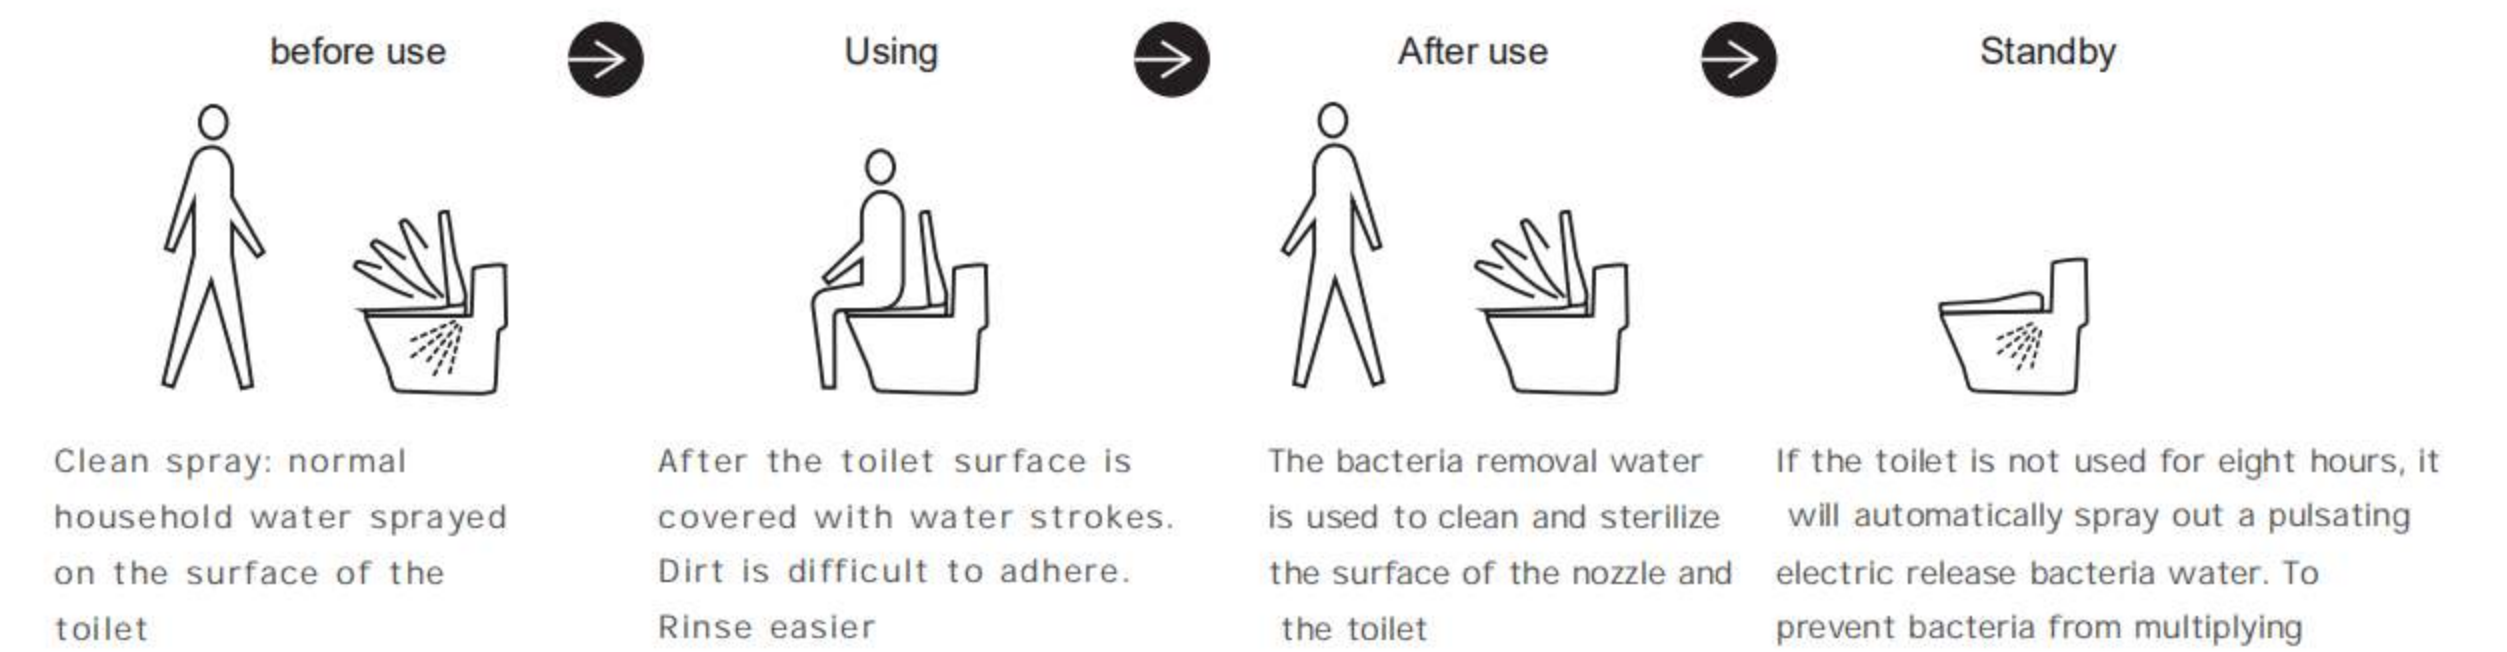

Water flows in narrow channels along the hairpin curve, and under constant water pressure thoroughly cleans the areas most likely to accumulate garbage, then rinses the entire toilet

PREMIST

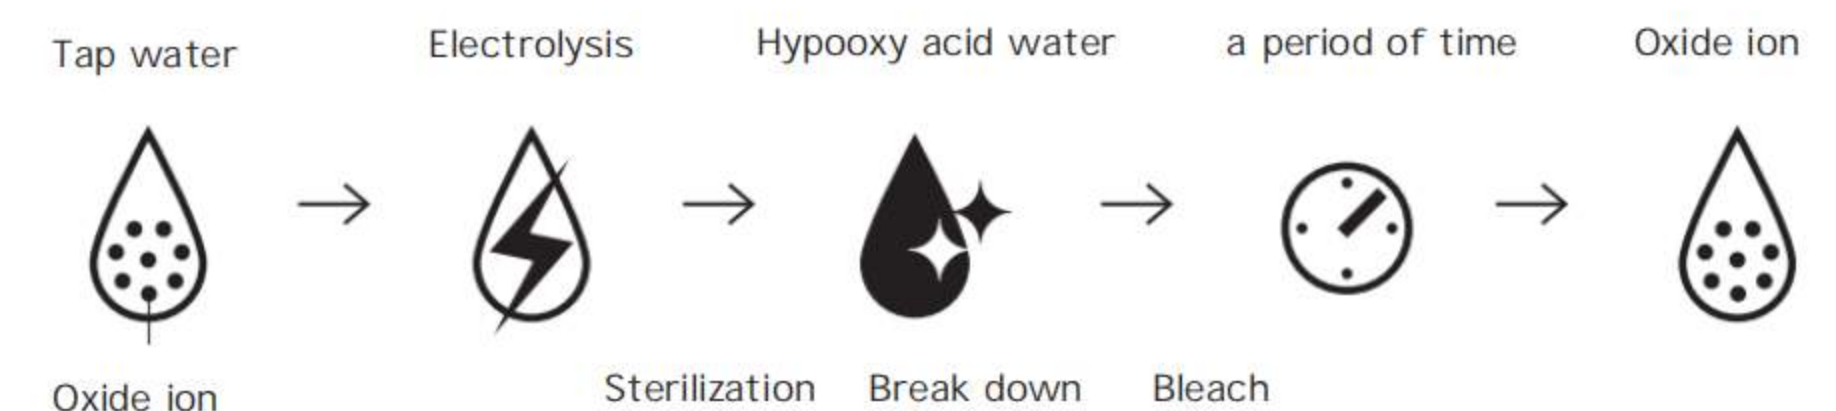

Before every use, PREMIST automatically sprays a small amount of water over the surface of the inner bowl, which helps washing the waste particles away easily

How to use electricity to keep bacteria water clean?

What is electrolysis bacteria water?

The ordinary domestic water is electrolyzed to form electrolyzed water. The hypochlorous acid component of the electrolyzed water has a sterilizing effect. The whole process does not add any chemicals and cleaning agents. After a certain period of time, the bacteria-removing water will be automatically restored to ordinary water. Natural and environmentally friendly

Multi-function Knob

Multi-users memory, easy for the old and kids. Feminine Wash, Posterior Wash, Stop/Dry, Off, One-button Flush

before use

AUTO OPEN / CLOSE LID

The toilet lid automatically opens quietly whenever someone comes close and leaves away.

USOFT LIGHT

When someone approaches the toilet at night, a soft dim lighting comes up without disturbing any other's sleeping.

Anti-splash Bubble Shield

A rich number of small bubbles get together on the surface of water in the bowl to become a stable bubble shield which is anti-splash and helps preventing the odor, dirt and bacteria from coming out to the air.

Using

HEATED SEAT

The toilet seat would be heated up to a comfortable temperature whenever someone approaches it.

POWERFUL DEODORIZER

Both at the time of using and after using, the toilet system would automatically start the function of powerful deodorizer, to help getting more fresh air in the bathroom

After use

AUTO FLUSH

Are you worried about forgetting to flush the toilet after using? It will never happen again! Our intelligent toilets flush automatically after each use without touching any button.

Healthy care, comfortable wash

Multiple washing options are available for your comfortable and healthy life. Professional ultraviolet sterilization technology ensures the best sterilization of the nozzle which would self-sterilize before each use to avoid bacteria and dusts.

Turbo siphon flush

Powerful flushing ability + Concealed watertank, help the flushing system work well even the income water pressure is quite low. High-tech intelligent deodorizer helps keeping the bathroom free from odor.
